Sri Charan Pitta

AI/ML RESEARCHER · STARTUP FOUNDER · GOOGLE STUDENT AMBASSADOR

Third-year B.Tech CSE (AI/ML) at Marwadi University. International Research Fellow at Southern Federal University under the Russian Science Foundation Mega-Grant. Founder of ElderAI Swarm — winning finalist and incubated at IIT Madras I-Summit (E-Summit '26). Two-time ET AI Hackathon semi-finalist. I build production-grade multi-agent AI systems for real-world impact — and I am looking for the next hard problem.

01 Profile

I work at the intersection of applied research and shipped products: multi-agent systems, LLM orchestration, computer vision and on-device intelligence. My work has taken me from a national startup podium at IIT Madras to a funded research exchange in southern Russia.

I care about AI that leaves the demo. That has meant building an elder-care platform with five collaborating agents, a fraud-detection system that learns a user's "behavioural DNA," a voice-first gateway to government services, and a wellness system that runs entirely on-device. I lead teams, organise hackathons, and build communities around the tools I use.
